

Fiche méthodologique

Comment passer d'Excel à EndNote ?

Groupe CIST Bibliométrie <http://ist.agropolis.fr/bibliometrie>

Objectif de la fiche :

Importer un fichier Excel dans EndNote

Préalable :

Disposer d'un fichier Excel contenant un seul type de document (exemple : Article)

A	B	C	D	E	F	G	H	I	J	K	L	M	N
PT	AU	BA	BE	GP	AF	BF	CA	TI	SO	SE	BS	LA	DT

Exemples d'application :

Récupérer dans EndNote les données issues d'un traitement bibliométrique dans Excel (notoriétés, facteurs d'impact, pays, ...)

Etape 1 : modifier l'en-tête du fichier Excel

Insérer sur la 1^{ère} ligne les noms des variables correspondant à EndNote

Attention, le nombre de champs personnalisés est limité à 8 dans EndNote. Il faut donc faire des choix pour désigner la destination des colonnes d'Excel que l'on veut récupérer dans EndNote (exemple : équipes, Facteur d'impact, nombre de citations, Web of Science Categories, ...).

Supprimer les colonnes que vous ne souhaitez pas importer dans EndNote

David, P; Lav	Postural control	EUROPEAN JOURNAL OF APPLIED PHYSIOLOGY	English	Article	Electromyography	The present study investigated the effect of a 10-day training period on the postural control of young adults. The subjects were divided into two groups: a control group and a training group. The training group performed a 10-day training program consisting of 10 sessions of 10 minutes each. The results showed that the training group had a significant improvement in postural control compared to the control group.	[Petitjean, M; Moscone, A	1	1439-6319	2012	112	1

Sauvegarder le fichier en format Texte (séparateur : tabulation)

Nom de fichier :	<input type="text" value="modif_fichier_Excel_pour_import_EndNote"/>
Type :	<input type="text" value="Texte (séparateur : tabulation)"/>

Etape 2 : ouvrir le fichier tabulé dans un éditeur de texte (type Bloc Note ou Word Pad)

```

Author -> Title+Journal -> Language -> Type of Article -> Keywords
-> Abstract -> Author Address -> Custom 4 -> ISSN -> Year -> Volume -> Issue
-> Pages+Pages+Pages+DOI -> Custom 3 -> Accession Number+Custom 1
-> Custom 2 -> Custom 5
"Petitjean, M; Ko, JYL" -> An age-related change in the ipsilateral
silent period of a small hand muscle -> CLINICAL NEUROPHYSIOLOGY
-> English -> Article -> Ageing; Transcranial magnetic stimulation;
Ipsilateral silent period; Motor cortex; Transcallosal inhibition
-> "Objective: To establish the presence or absence of an age effect
on the ipsilateral silent period (iSP) for the abductor pollicis brevis
(APB) muscle in healthy subjects. Methods: Twenty young adults (10 men,
10 women; age range: 20-40) and 20 older adults (10 men, 10 women; age
range: 50-70) were matched by age (+/- 5 years), gender and height (+/- 5
cm). All were right-handed. We investigated the iSP for the APB by

```

Avant la 1^{ère} ligne qui comprend les noms des variables du fichier, ajouter le type de document (comme utilisé par EndNote) précédé par une *

```
*Journal Article¶
Author → Title+Journal → Language → Type of Article → Keywords
→ Abstract → Author Address → Custom 4 → ISSN → Year → Volume → Issue
→ Pages+Pages+Pages+DOI → Custom 3 → Accession Number+Custom 1
→ Custom 2 → Custom 5¶
```

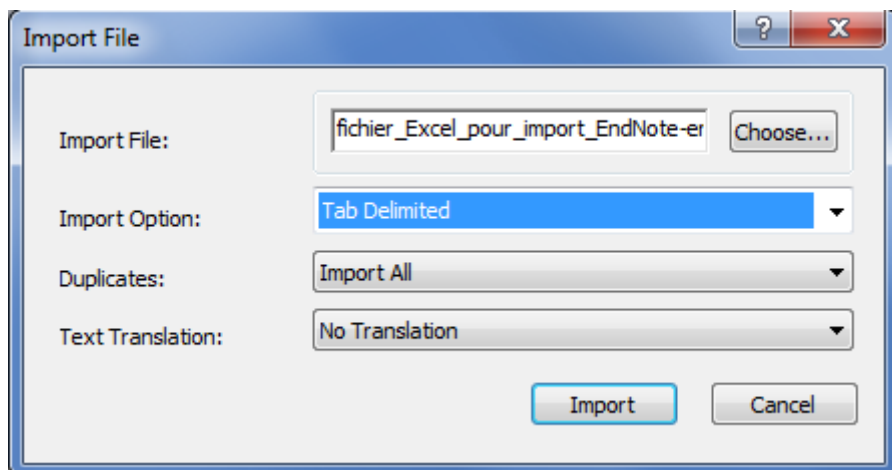

Sauvegarder le fichier en format texte.

Etape 3 : importer le fichier dans EndNote

Ouvrir EndNote

File > Import > File

Sélectionner le fichier texte sauvegardé précédemment

Utiliser le Filtre d'import « Tab Delimited »

On récupère ainsi les références dans EndNote, avec les champs personnalisés

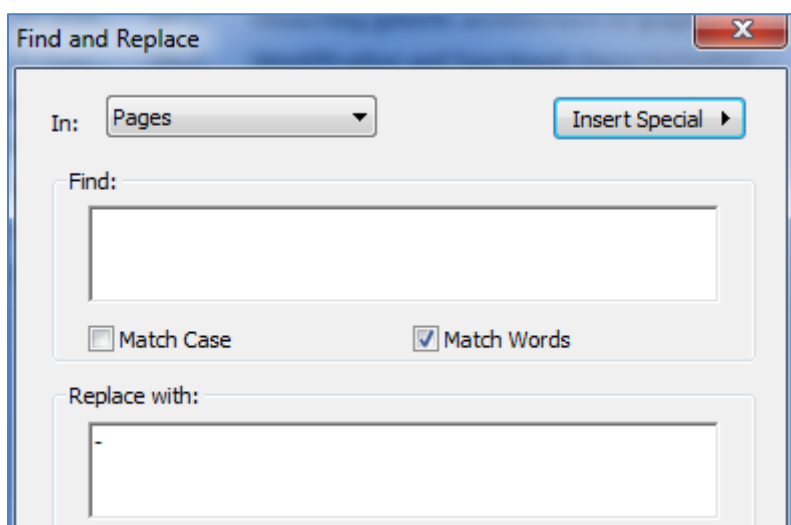

Custom 1	Equipe 3
Custom 2	1.02
Custom 3	Physiology; Sport Sciences
Custom 4	1
Custom 5	Q3

Annexe 1 : cas particulier pour la pagination

Dans notre exemple, nous avons regroupé dans le champ « Pages » plusieurs valeurs (BP, EP, AR), ce qui nous a conduit au résultat suivant

Pages 145 154

Il est alors recommandé de faire un changement global dans ce champ uniquement (Edit > Change Text ou Find and Replace dans la version X6), pour remplacer le retour chariot (Insert Special : return carriage) par un tiret

Ce qui donne :

Pages 145-154
